

Antaike 2014 Market Development Report

Primary Aluminum

Title	Content
Chapter 1	The Chinese government's industrial policies and guidelines on the primary aluminum industry
Chapter 2	Characteristics of the primary aluminum industry in 2014
Chapter 3	The current situation of Chinese primary aluminum capacity, production, consumption and the forecast
3.1	Chinese primary aluminum capacity in 2012-2014
3.2	Forecast on the newly-built primary aluminum projects in China in 2015-2016
3.3	Chinese primary aluminum output in 2015-2014
3.4	Forecast on the primary aluminum output in 2015-2016
3.5	Chinese primary aluminum consumption in 2012-2014 (by using industry)
3.6	Forecast on Chinese primary aluminum consumption in 2015-2016
Chapter 4	Chinese primary aluminum import & export
4.1	Chinese primary aluminum import & export in 2012-2014
4.2	Chinese primary aluminum import & export by country in 2014
4.3	Chinese aluminum alloy import & export in 2012-2014
4.4	Chinese aluminum alloy import & export by country in 2014
4.5	Chinese aluminum semis import & export in 2012-2014
4.6	Chinese aluminum semis import & export by country in 2014
4.7	Chinese primary aluminum supply/demand market balance in 2012-2014
4.8	Forecast on Chinese primary aluminum supply/demand market balance in 2015-2016
Chapter 5	Analysis on the production cost of Chinese aluminum smelters
5.1	Cash cost curve of Chinese aluminum smelters in 2014
5.2	The production cost structure of Chinese aluminum smelters in 2012-2014
5.3	Comparison of production cost of Chinese aluminum smelters by province/region in 2014
5.4	Comparison of production cost of Chinese low-cost and high-cost aluminum smelters (typical enterprises) in 2014
5.5	Analysis on cost on the raw materials in 2014
5.5.1	Electric power supply composition and the price change
5.5.2	Cost change in alumina
5.5.3	Cost change in anode carbon block
5.5.4	Cost change in fluoride salts
Chapter 6	Analysis on aluminum price movement

6.1	Analysis on aluminum price movement both on domestic and overseas markets in 2012-2014
6.2	Forecast on aluminum price trend both on domestic and overseas markets in 2015
6.3	Analysis on anode carbon block price movement in 2012-2014
6.4	Forecast on anode carbon block price trend in 2015
6.5	Analysis on fluoride salt price movement in 2012-2014
6.6	Forecast on fluoride salt price trend in 2015
Chapter 7	The great events of the aluminum industry in 2014 and analysis on the influences
Chief editor: Lang Dazhan, Zhu Yan Major researchers and writers: Yao Xizhi, GuoQiuying, You Zhenping, Shenlan, ZengZheng Editor and designer: Feng Lei Sales manager:	

Note: the capacity, output and consumption quantity in the white paper are the yearly and monthly figures, and sorted by province/region. The newly-added capacity are sorted by enterprise.

Profile of the research team member

Mr. Lang Dazhan: senior adviser of Beijing Antaike Information Development Co., Ltd., professor. He graduated with a major in Light Metal Metallurgy at Northeast University in 1966. Since 2001, Mr. Lang Dazhan has worked at the Enterprise Consultation Department and was the vice director of Aluminum Department of China Nonferrous Metals Industry Association (CNIA), vice secretary-general of the Aluminum Branch of CNIA. He has long been engaged in research on development of the domestic and overseas aluminum industries, policy study and industrial administration work and has broad and in-depth understands both on the domestic and overseas aluminum industries. He often publishes papers in the “China Aluminum Industry”, “Nonferrous Metals Industry”, “China Metal Bulletin” and other professional journals.

Ms. Zhu Yan: manager of the Aluminum Department of Beijing Antaike Information Development Co., Ltd., senior alumina analyst, vice chief editor of “China Aluminum Industry” monthly report, industry warming expert of the Ministry of Commerce of P.R. China. She graduated with a major in Management Science and Engineering at Tianjin University in 1994 and joined Antaike in October 1998. Since then, she has been engaged in analysis, forecast and consultation service on the bauxite, alumina and primary aluminum markets as well as the development plan and strategy research for the aluminum industry. Ms. Zhu Yan has participated in many large-sized consulting projects and strategic plan projects for the related Chinese government departments such as the National Development and Reform Commission (NDRC) and the Ministry of Commerce of P.R. China, Chinese leading aluminum producers such as Aluminum Corporation of China Limited (Chalco), China Power Investment Corporation (CPI) and the multinational aluminum companies such as Rio Tinto Alcan and Hydro. Ms. Zhu Yan has made reports both on domestic and international aluminum conferences and published the papers in the nonferrous metals and other professional journals in many times.

Mr. Yao Xizhi: senior aluminum analyst of Beijing Antaike Information Development Co., Ltd.. He joined Antaike in 2008. He has long been engaged in analysis on the primary aluminum market and participated in many consulting projects and often makes reports both on domestic and international aluminum conferences and publishes analysis reports about the aluminum and

carbon used for aluminum markets in professional journals.

Dr. You Zhenping: He obtained a Ph. D. degree in Engineering at the General Research Institute of Nonferrous Metals in Beijing in June 2011, mainly engaged in research of nonferrous metals materials manufacturing and processing technology and participated in many national defense projects and civilian development projects. Partial of the developed materials have been successfully used in Chinese aerospace industry. Dr. You Zhenping joined Antaike in 2011 and now specializes in study work on the primary aluminum and carbon used for aluminum industries. He has taken part in many large-sized consulting projects and strategic plan projects for the related Chinese government departments and the key enterprises.

Ms. Guo Qiuying: alumina analyst of the Aluminum Department of Beijing Antaike Information Development Co., Ltd.. She graduated at the North China Electric Power University in 2009. Since then, she has been engaged in analysis and consultation service for the aluminum industry. She joined Antaike in 2011, specializing in analysis and study on the alumina, primary aluminum and aluminum fluoride markets. Ms. Guo Qiuying has taken part in surveys on many domestic alumina refineries, aluminum smelters and aluminum fluoride plants and conducted the consulting projects.

Ms. Zeng Zheng: She graduated with a major in Industrial Analyzing at the Chemical Engineering College of Guangxi University and obtained a bachelor degree. In 2004-2009, she worked for China Aluminum International Engineering Corporation Limited and participated in the Vedanta's Balco aluminum smelter project and Jharsuguda aluminum smelter project in India, helping the Indian company to the large-sized modern aluminum smelters. In 2010-2011, she worked at Accenture Consulting Co., Ltd. and was charged with consultation service on management of the state-owned enterprise supply chain. She joined Antaike in 2012 and now specialized in study work on the primary aluminum market.

Ms. Shen Lan: She has a master's degree in economics, editor of "China Aluminum Industry". She joined Antaike in June 2011 and now is mainly engaged in study work on aluminum consumption and operations of multinational corporations. She has participated in many large-sized consulting projects and strategic plan projects for the related Chinese government departments and the key enterprises.
